

Vi har gleden av å invitere til forelesning og hands-on
TORSDAG 29. og FREDAG 30. august 2019.

Advanced Composite

By Dr. Jason Smithson

Han kalles "one of the best teacher of Composite resin in the world". Hans CV er lang, og Dr. Smithson har mottatt mange priser og utmerkelse. Med mer enn 1000 forelesninger og kurs, og flere publikasjoner er Dr. Jason Smithson en meget verdsett og populær foreleser, både i eget land og internasjonalt. Hans arbeidskurs får høyeste karakter, og gir den almenpraktiserende tannlege en mengde kliniske tips og teknikker. Tips som enkelt kan forbedre dine estetiske restaureringer på en raskere og forutsigbar måte.

Overview

Norsk Orthoform depot are delighted to announce that Jason Smithson will return in august 2019 for this 2 day Hands on Advanced Composite Course.

Conventionally, discolored teeth and advanced wear cases are treated with indirect restorations: crowns and veneers. This approach is well based in the literature and over time, has proven highly successful, however, in some cases it may prove expensive in terms of overall cost, treatment times and most critically loss of tooth structure.

This Master class is designed to allow the experienced practitioner to confidently approach more challenging anterior cases with direct resin in combination with a sound understanding of functional occlusion.

What You Will Learn

- A simple approach to the direct resin veneer: create masterpieces easily and predictably.
- How to handle the peg lateral and microdont teeth
- Functional smile design.
- How to handle complex cases such as discolored and misaligned teeth with direct resin in conjunction with simple predictable home whitening.
- An intuitive approach to reconstruct worn broken down teeth creating functional occlusions with direct resin. To include increasing the vertical dimension and re-establishing anterior guidance.

Torsdag 29. og fredag 30. august 2019, kl. 08.00 til ca. 17.00.

NODs kurslokaler

Kursavgift: kr 9.900,- (etter 1.6.2019, kr 12.500,-)
inkl. kursmateriell, servering og Dr. Smithsons favoritt komposittinstrument

Maks. 20 deltakere.

Kurset teller 14 timer i NTFs etterutdanningsystem.

Hands-On Component

The practical class is a natural partner to the presentation: all aspects will be covered on a single typodont model in a user-friendly manner, which is applicable to the General Practitioner and Specialist alike. Dr Smithson throughout will carry out each exercise in a stage-by-stage "Follow my Leader" fashion with close support.

The approach is casual and delegates are encouraged to ask questions as they work.

Key Features

- A course which includes real life clinical scenarios: treat three anterior teeth simultaneously on one model in real time.
- A two-day intensive class: 75% hands-on with evidence based data
- Comprehensive course manual and reference papers included

Learning Objectives

- The Resin Veneer for the discolored tooth (lateral incisor)
- Reconstruction of the worn tooth (Central Incisor)
- The Peg Lateral Incisor
